# Time Management GUI

By: Prosper Jibunor Enterprise

Design & Architecture

- Created A Flutter GUI application using Firebase for Chrome and Andriod

- Took User Requirements into account
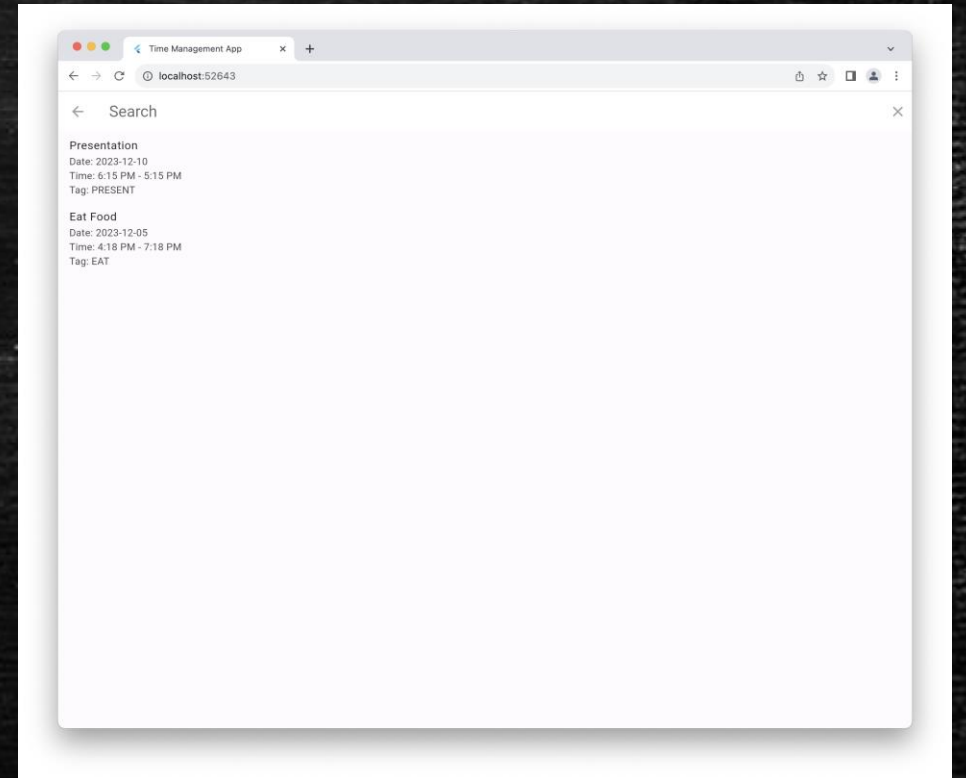

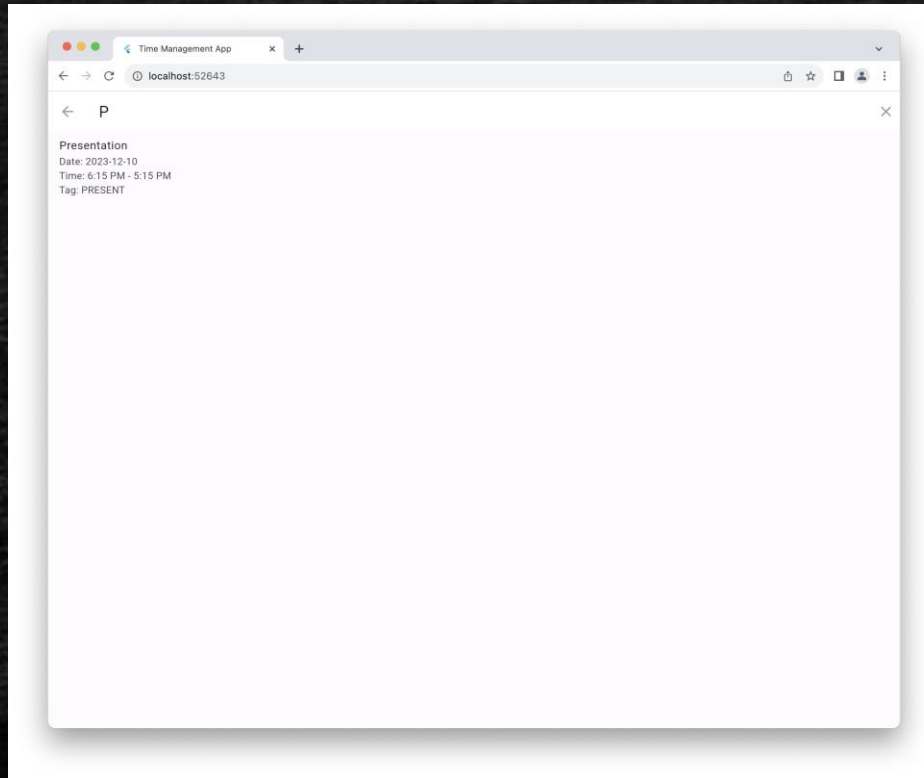

- Worked within timeframe & budget

Features: Add Task

- Add Task allows the user to press the 'Add' button and input their data to track their time management

- The data is saved to a Firebase server and is displayed in the search section

Features: Query

- Query Feature is used to search through the data within the database

- User can query by DATE, TAG, or TASK
